

Advanced Swiss Screw Machining Capabilities

Specializing in Swiss machine manufacturing.
Ultra-precise production with superior results.
Expert solutions for multiple industries and applications.

Tooling Dynamics has integrated Swiss screw machining into our full array of precision micro-miniature production capabilities, to give you the resources you need to meet today's demanding manufacturing schedules.

- Quick turn
- Prototype capabilities
- High-volume production
- Solutions for your complete high-precision demands

CNC Swiss machining capabilities

- Citizen L20 and K16E CNC with high-pressure systems
- Capacity: through .812 bar stock
- Sub-spindles, C axis rotation, live tooling
- CAV automatic magazine bar feeds
- Ultra-sonic cleaning system
- PartMaker
- SolidWorks

Superior quality for all your parts manufacturing

For over 30 years, Tooling Dynamics has specialized in producing high-volume, ultra-precise parts for some of the most demanding industries.

Tooling Dynamics supports the following industries:

- Electronic
- Aerospace
- Military
- Hydraulic
- Medical
- RF Microwave
- Automotive

From design and prototype through build and production, let us put our engineering expertise and ISO 9001:2008 registered manufacturing facilities to work for you.

Precision. Quality. Dependability. For the world-class electronics parts and connectors you need, count on Tooling Dynamics.
